Forum Responsible Gold

We are dedicated to the responsible sourcing
and trading of gold!

What do we do?

We promote the exchange of experience and information between the gold industry, civil society, academia, and development cooperation. We raise awareness among the public, politics and industry for issues related to responsible gold supply chains.

We inform about the social and ecological challenges of gold mining as well as about gold recycling processes. We work to increase the market share of responsible gold. We thereby contribute to improving the living and working conditions of people working in gold mines and to strengthening environmental protection along the gold supply chain.

Our offer

- Lectures and workshops
- Event series “Responsible Gold”
- Teaching materials on small scale gold mining for vocational schools
