## INFORMATION

The sector programme “Extractives and Development” at the Federal Institute for Geosciences and Natural Resources (BGR) supports the Federal Ministry for Economic Cooperation and Development (BMZ) in providing policy advice on matters related to the extractive industry and natural resources. It helps the BMZ to shape the national and international development agenda in the raw materials sector.

Among other activities, the sector programme at BGR has been coordinating the event series “Responsible Gold” since 2018. The event series serves as a forum for the exchange of information and experience between the private sector, civil society, academia and development cooperation on the topic of responsible gold supply chains. Further information on the sector project can be found on our website, which is jointly operated with our partner project “Raw Materials and Development” at the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ).
